

*The*  
*Kindergarten Math Program*

is designed to give students the opportunity to practice throughout the day the number skills they are learning in the classroom as well as to increase their love for math and motivation to learn. The goal is for students to practice any math concept for fifteen minutes each day. Math concepts can include counting, patterning, writing numbers, telling time, adding, and measuring. After practicing with your child, record what was practiced on the attached chart and return to school. Completed charts will earn three soaring points to spend in the Eagle Store, as well as cargo stickers on their memory verse train. The number of cargo stickers your student earns throughout the year will be a major factor in determining the math award to be given out at the Awards Ceremony in the Spring.

## KINDERGARTEN MATH PROGRAM

**Goal: 10 to 15 minutes of math concept practice per day**  
**Fill out the chart below and return to school.**

***A completed chart (minimum five days) will earn three soaring points and a cargo sticker.***
